What is this CD for?

There are many kinds of music & sound in this world. Most of all relaxation CDs for babies contain only soft classic music... However, babies must want to listen to cool music more in fact!! This is a compilation album for such babies. It's the album which interesting and stimulative artists (from DAT Politics to Toshiya Tsunoda) participated. Lo-fi (Cftpa), Jumping pop! (DAT Politics), Turntable noise (BusRatch), Electric glitches (Ryoichi Krokawa), 8 violins' classical (Marko Ciciliani)... We hope that babies grow healthily with this stimulative album. Hi, baby! Come on and listen to it!! (This album is a message to baby from adult, and "amorfon005 Kindermusik: Improvised Music by Babies" is a message to adult from baby.)
